SUMMARY

Graduate in Information Technology specializing in Mobile Computing with added skills in Artificial Intelligence, chatbot development, and securities compliance. Skilled in machine learning, system analysis, and project management. Demonstrated ability to design, develop, and deploy user-friendly solutions. Seeking opportunities to leverage expertise in IT and AI engineering to drive innovation and contribute to organizational success.

EXPERIENCE

Freelance IT Specialist | Upwork

January 2025 – Present

- **End-to-End Web Development**: Orchestrated the full lifecycle of static website projects, from initial stakeholder requirement analysis using structured discovery tools to final project delivery.
- **UI/UX Design & Architecture**: Developed comprehensive site maps and high-fidelity mood boards in Figma to align brand identity with user interface direction.
- **Frontend Engineering**: Developed responsive, SEO-optimized web templates using semantic HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and mobile responsiveness.
- **Technical Infrastructure**: Managed backend deployment via cPanel, including DNS A-record configuration, SSL certificate installation (HTTPS), and troubleshooting mixed-content security issues.
- **Process Automation**: Integrated third-party lead generation tools such as Google Forms to automate client data collection and workflow documentation.

Research and Development Intern | Thriving Talents

Oct 2023 – Jan 2024

- **Research and Development**: Explored and implemented learning technologies for internal and external use cases, specifically focusing on custom ChatGPT and related AI technologies.
- **Documentation**: Managed IT documentation for custom GPT projects and reformatted content according to pre-established guidelines.
- **E-commerce and SEO**: Created and managed e-commerce stores on platforms such as Etsy and RedBubble, utilizing Alura for SEO optimization.
- **Data Analysis**: Performed research on market trends to support company marketing efforts.
- **Website and Workshop Support**: Assisted in the development of websites for company projects and facilitated training workshops.
